

Submission of poem - GLOBAL LOVE DAY 2024

TO MAKE US EVER ACTIVE

By respecting every cultural identity
By respecting our fellow humanity;
Only then, love and compassion evolve,
To build a strong bond of universal love.

If love begins to sprout in every heart;
There's every possibility, yes, why not?
Love and concern! Can any force halt?
They have the energy to stir any heart.

Vanity and ego make any person blind
But love can reform and change the mind,
It's such an exciting tool for human unity,
It accepts forgiveness and hugs diversity.

Why not each one of us strongly aspire
Love begins with me, be the sole desire;
Hatred and enmity, let us douse such fires,
As civilized human, let us douse our ire.

With innate oneness, allow peace to survive
The whole of the planet will certainly thrive,
Let our hearts brim with unconditional love,
To shun ignorance and to make us ever active.
