

**Submission of poem - GLOBAL LOVE DAY 2025**

**THE SOIL OF LOVE**

Whenever the seed of trust is properly monitored  
Whenever "*the soil of love*" is properly watered,  
Love begins to take the deeper and deeper roots,  
Then shall begin the fruitful phase of the sprout.

Love, when spreads from individual to individual  
Very soon, it spreads the lovely branches in multiple,  
Devoid of religion and culture, it gathers all people,  
Gives a lovely shelter to exchange views and mingle.

Harbouring hateful feelings is a distressing element,  
Rise above the feelings of jealousy and resentment;  
Love is a strong remedy to overcome such attitude,  
It can influence and take us to a much better altitude.

Respecting others, as also respecting their culture  
In the conflict-bent world, it's the need of the hour,  
The acts of love, whatever and wherever we spread,  
No doubt, for the welfare of humanity they will lead.
